#### **COMMODORE 64 DISK**

Insert the disk into the drive and type LOAD "\*", 8, 1  
The game will load and run.

#### **IN THE YEAR 2021...**

An experiment went horribly wrong, and an angry T.Rex is now threatening Cadillac drivers on the highways around Los Angeles.

**T-Wrecks Cadillacs** is an exciting and high intensity action game demanding exceptional wit and quick reflexes. Destroy all Cadillacs before they escape your Jurassic Fury. Control your movement by use of the input device. Steer yourself in the direction you wish to go and press FIRE to unleash your devastating **TAIL SWIPE**.

T.Rex is controlled by the player using the joystick input device.

Small cars can be destroyed for 50 Points  
but don't let them run you over.

Large cars are tougher than small cars  
but they give you 150 Points for  
destroying them.

Collect treasure chests to rack up points quick.  
They're also exceedingly rare.

What the gold star item does is a mystery..

**Lives = 3**

The player starts the game with 3 lives, every time T.Rex gets hit, one life is subtracted. When all lives have been depleted it's GAME OVER.

**Score = 000000**

Accumulate points to get a high score! For every 1000 points the player receives an extra life.
